2023 BROCHURE

1 CLIMBING & BOULDERING WALLS

Multiplay design, build, install and maintain climbing walls for leisure facilities worldwide. In addition to our low-height and traverse climbing walls, we also supply a wide array of modular climbing wall products and related equipment.

We've worked hard to create a range of artificial climbing walls in order to offer our clients exceptional fun-packed products at great prices. Choose from a selection of modular climbing walls with a wide range of innovative designs and climbing challenges.

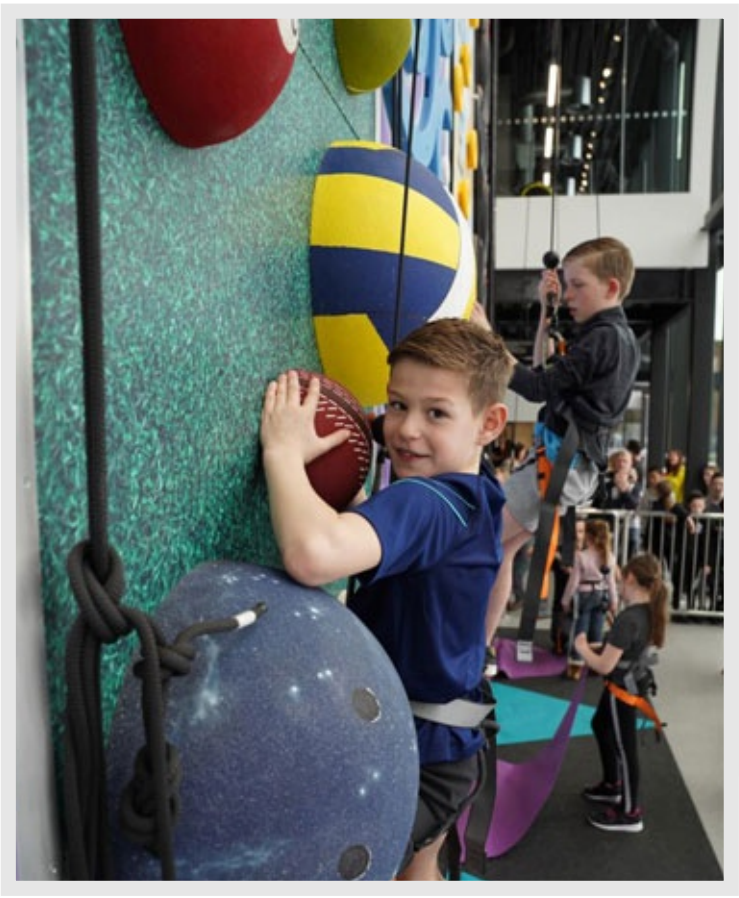
We can also supply traditional indoor climbing walls as well as bouldering walls and artificial cave systems. All structures can be built to suit any space. Whatever the age or ability of your visitors, we'll ensure that your facility will be an ongoing attraction.

If you're looking for something new and innovative, we can provide interactive climbing walls which are a fun-packed way to challenge yourself or others with a range of augmented games and problems.

We'll supply everything you need for your facility, from the climbing structures to the safety equipment - harnesses, helmets and auto-belay systems. We can train your staff on all the important aspects, such as safety, cleaning and maintenance, route setting and much more.

Whether you're operating a climbing-only facility or your space is combined (e.g. with a trampoline park), Multiplay are able to deliver every aspect of your project. There's no need to deal with multiple companies - we offer a one-stop solution.

REACH NEW HEIGHTS



> “Multiplay have delivered a quality climbing wall into a focal point of the new Move Urmston public leisure centre. This is a first of its kind install in the North West with all parties proud of what has been achieved. Multiplay were able to adapt to the challenging space allocations and live site environment to meet the programme demands. We would recommend them for future installations.”
